the quality brand-name™

drywall screws ~ coarse thread

designed for drywall-to-wood studs

*used by professionals*

Premium Quality  
High-Grade Carbon Steel  
Superior Hardening Process  
ISO Factory Accreditation  
Exceeds ASTM Standards

Featuring:

- Stick-Fit #2 Phillips Recess
- Helically-Designed Coarse Thread, 9 per Inch
- Super-Sharp Point
- Industry-Leading 48 Hours Salt Spray Phosphate

Benefits:

- Proper recesses reduce dropped or misaligned screws.
- Fewer threads, fewer revolutions, faster installation time.
- Deeper threads ensure maximum holding power.
- Higher corrosion resistance.
- Wood fibres are, in fact, pulled upwards during installation. As the wood dries, the natural tendency is to spring-back to their original position. The drying wood pulls the screw inwards, eliminating head pop-ups.
